ROBOTHEART: all the top players will be at the event.

16/05/2024

Less than six months before the debut of the seasonal edition of RobotHeart, the most important players in the robotics industry have already confirmed that they will exhibit in the halls of 34 BI-MIL at Fieramilano Rho from 9 to 12 October 2024.

ABB, ABI AUTOMAZIONE, ALFO ROBOTICS, APPLYCA, ARROWFIELD, AUTOMAZIONI INDUSTRIALI, BAKR MOULTECHNIK, CIA AUTOMATION AND ROBOTICS, COMAR, DEM, THE HUMAN AUTOMATION ELETTRICABILAGGI MA ROBOTICA, EWM, FANUC ITALIA, GIBBONI MACHINES, IRIIL IEM, KUKA, LABORNIK PROVIDE SOLUTIONS, LUCAS, M.A. ROBOTICA, ROBOTECO, ROBOTENIS ITALIA, SCAGLIA INDEVA, SCHUNK, SIR, SIRI-Saloni Robotics and Automation Associates, SEAR AUTOMATION, STALISIA, TECNOROBOT, TESSE ROBOT, UNIVERBAL ROBOTS, WENGLER SENSORI are among the exhibitors of the initiative.

ROBOT HEART

THE ART OF SMART ROBOTICS

"The satisfaction expressed by the exhibitors of RobotHeart at BI-MIL, at the end of the event in 2023 – said Alfredo Marzetti, general manager of UCIMU-SISTEMI PER PRODURRE – has been confirmed by the high number of applications received to exhibit next October. To date, all the big players of the robotics sector have already confirmed that they will participate, to the benefit of the quality of the innovation on show. On this basis and considering the availability of Government incentives for the occupation of state-of-the-art technologies, we can only expect excellent results from the next BI-MIL. We are confident that RobotHeart will have even greater success than it did in the first edition".

9-12 OCTOBER 2024

"After an – added Alfredo Marzetti – 3-year journey, the initiative returns to Italy dedicated to the center of industrial robots, aimed at all manufacturing sectors: mechanical engineering, machine tools, electronics,

automotive, food and beverage, pharmaceuticals, logistics, packaging, biomedical industry, cosmetics and so on. This special feature makes the event an opportunity of great appeal, in a country that keeps on achieving positive results in the sector".

"Indeed, according to the latest official data from IFR, International Federation of Robotics - controlled Alfredo Marini - in 2023, Italy ranked sixth in the world with regard to the number of robots installed, with a 16% market share in the European Union and an 8% increase in installations, amounting for 11,479 units.

Sponsored by SIRA, the Italian Robotics and Automation Association, and organised by EFFICIENTE FIERA (FALLAME MACCHINE), the second edition of RobotHeart will have at its key players, along with manufacturers and integrators, also universities and representatives of the academic and research world, startups and start-ups, all of them depicting the multiple faces of a sector that is today crucial for the competitiveness of the industrial system, a winning synergy between robotic technology, artificial intelligence and connectivity.

Finally, to complement the technological offerings at the exhibition, there will be several thematic in-depth events, organised mainly on the Robotics Day, on Friday, October 11: on that occasion, within the 01-03/10/24 arena, in addition to the battery of speeches by the exhibiting companies, a rich program of meetings will be proposed by the main organizations representing the sector, such as IFR (International Federation of Robotics), SIRA, I-RISA (Italian Institute of Robotics and Intelligent Machines), AIAA (Italian Association for Artificial Intelligence) and EFFICIENTE-SISTEMI PER PRODURRE.
